Exam Date: _____

Examiner: _____

Certifying Officer: _____

Candidate Name: _____
(Last name, First name)

Initial: YES/NO (circle one)

PASS/FAIL

Retest: YES/NO (circle one)

PASS/FAIL

Examiner: _____

Time: _____
start elapsed

Cardiac Arrest Management EMT-Intermediate

Time Limit: 10 minutes

Event	Points Possible	Points Awarded
1. Takes or verbalizes body substance isolation precautions.	1	
2. Checks level of responsiveness.	1	
3. Checks ABCs.	1	
4. Initiates CPR if appropriate (verbally)	1	
5. Attaches ECG monitor in a timely fashion or applies paddles for "Quick Look".	1	
6. Correctly interprets initial rhythm.	1	
7. Appropriately manages initial rhythm.	2	
8. Notes change in rhythm.	1	
9. Checks patient condition to include pulse and, if appropriate, BP.	1	
10. Correctly interprets second rhythm.	1	
11. Appropriately manages second rhythm.	2	
12. Notes change in rhythm.	1	
13. Checks patient condition to include pulse and, if appropriate, BP.	1	
14. Correctly interprets third rhythm.	1	
15. Appropriately manages third rhythm.	2	
16. Notes change in rhythm.	1	
17. Checks patient condition to include pulse and, if appropriate, BP.	1	
18. Orders high percentages of supplemental oxygen at proper times.	1	
Total	21	

SEE CRITICAL CRITERIA ON REVERSE SIDE

CRITICAL CRITERIA:

- _____ Failure to deliver first shock in a timely manner due to operator delay in machine use or providing treatments other than CPR with simple adjuncts.
- _____ Failure to deliver second or third shocks without delay other than the time required to reassess rhythm and recharge paddles.
- _____ Failure to verify rhythm before delivering each shock.
- _____ Failure to ensure the safety of self and others (verbalizes “All clear” and observes).
- _____ Inability to deliver DC shock (does not use machine properly).
- _____ Failure to demonstrate acceptable shock sequence.
- _____ Failure to order initiation or resumption of CPR when appropriate.
- _____ Failure to order correct management of airway (ET when appropriate).
- _____ Failure to order administration of appropriate oxygen at proper time.
- _____ Failure to diagnose or treat 2 or more rhythms correctly.
- _____ Orders administration of an inappropriate drug or lethal dosage.
- _____ Failure to correctly diagnose or adequately treat v-fib, v-tach, or asystole.
- _____ Failure to follow the current AHA ACLS guidelines.

Examiner Note: Follow the current AHA ACLS algorithm.

You must factually document your rationale for checking any of the above critical items below.
